EDUCATION

University of Calgary

Sept. 2023 - Aug. 2025

MSc in Computer Science (Thesis-based)

Advisor: Professor Ryo Suzuki

Hong Kong University of Science and Technology

Sept. 2018 - Aug. 2022

BSc in Data Science and Technology

Thesis Advisor: Professor Xiaojuan Ma

RESEARCH INTEREST

My main research area is **Human-Computer Interaction**, with a focus on **Mixed Reality** and **Human-Robot Interaction**. I investigate how computational systems shape human perception and behavior, developing technologies that enhance human capabilities through both system design and cognitive approaches.

WORKING EXPERIENCE

SenseTime Group Inc.

Jan 2021 - Jan 2022

Research Intern

Contributed to diverse machine learning projects, addressing neural collapse in transfer learning and developing a comprehensive vision model training framework. Explored few-shot distillation techniques and implemented language models, including BERT and GPT-2. Pre-trained large-scale visio-linguistic models and worked on reinforcement learning systems like AlphaZero.

Creativity Lab, UCSD

July 2022 - Nov 2022

Remote Intern

Designed and conducted data collection for a comprehensive multi-modal gesture database, capturing diverse modalities including head movements, hand signals, full-body gestures, etc. Developed a web interface enabling gesture designers to analyze modality availability patterns across different interaction scenarios.

CHI 2024

EXTRACURRICULAR ACTIVITIES

HKUST Robotics Team

Winter 2019 - Summer 2022

Hardware and Software Engineer

Designed and implemented a machine learning-based navigation algorithm for intelligent cars on the K60 microcontroller, and collected the data for training. Developed the car's mechanical structure from scratch, including design and construction. Designed and soldered custom PCB boards.

SKILLS

Programming Languages and Frameworks: Python (Proficient), C# (Proficient), Pytorch (Proficient), C++ (Proficient), Swift (Proficient), R (Familiar), Java (Familiar), JavaScript (Familiar), SQL and NoSQL (Familiar)

Web Technologies: React (Proficient)

Software and Tools: Unity (Proficient), Tableau (Proficient), Qualtrics (Proficient), OpenRefine
